## Technical Skills

---

### Strong

JavaScript (ES5, ES6), React, Node.js, Express, jQuery, PHP, MySQL, HTML5, CSS3, OOP, Restful APIs, SEO (Search Engine Optimization)

### Experienced

React-Native, Redux, Apache, Bootstrap, Fetch, Java

### Tools

Git, GitHub, Visual Code, MeisterTask, npm, Webpack, AWS, Agile Methodology

## Professional Experience

---

### Teacher Assistant / Tutor, LearningFuze

2020 – Present

- Assist in teaching LearningFuze students **JavaScript, React.js, jQuery, HTML5, and CSS3**
- Teach and explain coding best practices to students as well as providing encouragement and guidance with debugging applications
- Tutor and come along students outside of normal class hours to clarify any difficult concepts or bugs that require attention

### Marketing Administrator, The Training Spot

2018 – 2019

- Oversaw and managed customer relations, operations and social media strategies at one locations of the Training Spot
- Creating social media campaigns on Facebook and Instagram to increase traffic
- Utilized SEO tools on weekly blog posts / daily social media posts to increase activity
- Implemented Google Analytics to track local trends and translate them into a social media strategy
- Created email campaigns and contact management using Infusionsoft

### Marketing Coordinator, Tenor Wines

2017

- Managed customer interactions in the main tasting room including portfolio wine tastings, farm to table dinners, garden tours, and large event hosting
- Managed Wordpress site - including updating monthly releases and creating SEO strategies to increase traffic
- Created weekly / monthly / quarterly emails to be sent to a base of 30,000
- Maintained and managed content on the website such as blogs, wine scores, portfolio timelines, and photos
- Handled event management including booking bands and entertainment for events every Friday evening
- Created organization systems to manage files from 10 years worth of Dropbox uploads

## Applications Developed

---

### Get Beer Here, [GitHub](#) | [Live](#)

- Developed a **full stack** application allowing the user to browse a beer related store where user can view product, add items to cart, and checkout / clear cart
- Designed utilizing **React.js** on the front end, **MySQL** databases and **PHP** for backend structuring
- Implemented **Bootstrap** for a snappier and more **mobile responsive** design with a consistent feel to the whole application
- Utilized **Webpack, npm, and AWS EC2** for live deployment

### Local Sports, [GitHub](#) | [Live](#)

- Designed an app from the ground up that allows the user to input a city or sports preference to have all of the locations in the area that have that sport available
- Created a database structure for all of the working elements using **DbDesigner** and **Meistertask**
- Built out all of the databases using **MySQL** and **PHP** and connected them with relational databases and **PHP** queries
- Constructed the app alongside 3 front end developers to make sure each **UX** feature correlated with the correct data from the back end
- Developed using the **Agile Methodology** where features were adjusted as needed using relational database structuring

### Hearthstone Memory Match, [GitHub](#) | [Live](#)

- Created a memory game with a Hearthstone theme using **HTML5, CSS3, JavaScript** and **jQuery**
- Designed a standard **HTML5** skeleton frame wire but refactored to be dynamically generated using **jQuery**
- Developed cards dynamically using **jQuery** to randomize on load and tracks stats such as accuracy and matches won
- Stylized based on the same scheme of the game Hearthstone using **flex** and assets directly from Blizzard's website
- Utilized **Media Queries** for the game to be **mobile responsive**

## Education

---

**LearningFuze, Accelerated Web Development Program**  
60 hours a week for a total of 700+ hours of programming spent coding under the guidance of experienced senior developers

**Bastyr University, Holistic Landscape Design Certification**

**Biola University, Marketing Management**
