## Technical Skills

---

### Strong

JavaScript (ES5, ES6), jQuery, React, PHP, HTML5, CSS, OOP, APIs, SEO

### Experienced

MySQL, Node.js, Apache, Bootstrap, Fetch, Java

### Tools

Git, Github, Visual Code, MeisterTask, NPM, Webpack, AWS, Agile Methodology

## Professional Experience

---

### Marketing Administrator, The Training Spot

2018 – 2019

- Oversaw and managed one of the 3 locations of the Training Spot, a personal training studio
- Creating social media campaigns on Facebook and Instagram to increase customer traffic
- Created email campaigns and contact management using Infusionsoft
- Prequalified prospective clients via phone

### Marketing Coordinator, Matthews Tenor Wines

2017

- Managed customer interactions in the main tasting room including portfolio wine tastings, farm to table dinners, garden tours, and large event hosting
- Maintained and managed content on the website such as blogs, wine scores, portfolio timelines, and photos
- Handled event management including booking bands and entertainment for events every Friday evening
- Created organization systems to manage files from 10 years worth of Dropbox uploads

### Tour Guide, Redhook Brewery

2015 – 2016

- Conducted hour-long public and private brewery tours three times a day for groups as small as 1 to as large as 70
- Oversaw quality control taste panel conducted by microbiologist and brewer to test current and new styles of beer

## Applications Developed

---

### Hearthstone Memory Match, GitHub | Live

- Created a memory game with a Hearthstone theme using **HTML**, **CSS**, **JavaScript** and **jQuery**
- Designed a standard **HTML** skeleton frame wire to get a working project but refactored to be dynamically generated using **jQuery**
- Developed cards dynamically using **jQuery** to randomize on load and tracks stats such as accuracy, games won, and matches won
- Stylized the game based on the same scheme of the game Hearthstone using **flex** and assets directly from Blizzards website
- Used **Media Queries** for the game to be **mobile responsive**

### Get Beer Here, GitHub | Live

- Developed a **full stack** application allowing the user to browse a beer related store where user can view product details, add items to their cart, and checkout / clear cart
- Designed utilizing **React.js** on the front end, **MySQL** databases and **PHP** for backend structuring
- Implemented **Bootstrap** for a snappier and more **mobile responsive** design with a consistent feel to the whole application
- Used **Webpack**, **npm**, and **AWS EC2** for live deployment

### Local Sports, Github | Live

- Designed an app from the ground up that allows the user to input a city or sports preference to have all of the locations in the area that have that sport available
- Created a database structure for all of the working elements using **DbDesigner** and **Meistertask**
- Built out all of the databases using **MySQL** and **PHP** and connected them with relational databases and **PHP** queries
- Constructed the app alongside 3 front end developers to make sure each **UX** feature correlated with the correct data from the back end
- Developed using the **Agile Methodology** where features were adjusted as needed using relational database structuring

## Education

---

### LearningFuze, Accelerated Web Development Program

60 hours a week for a total of 700+ hours of programming spent coding under the guidance of experienced senior developers

### Bastyr University, Holistic Landscape Design Certification

### Biola University, Marketing Management
